Education

University of Saskatchewan

Expected Graduation: May 2026

Bachelor of Science — Major Computer Science

Saskatoon, CA

- Minor in **Theoretical Mathematics**
- Relevant coursework: Programming Principles and Practice, Introduction to Computer Organization and Architecture, Mathematical Logic and Computing, Developing Object-Oriented Systems, Intermediate Data Structures and Algorithms, Full Stack Web Programming, Linear Algebra I, Calculus I, Introduction to Mathematical Reasoning

Work Experience

Qutrix

Nov 2021 – Jan 2022

Software Developer Intern

- **Authored** and **directed** multiple user-interface components using **SCSS (CSS preprocessor)**, improving the application's **design** and **responsiveness**, with **75%** of the updates successfully deployed to production.
- Optimized the web application using **React.js** by leveraging advanced and modern libraries, **improving efficiency**. Implemented **dynamic routing**, while working with **APIs** and **HTTP requests**, with interactive user-interface components (calendars, login systems) while enhancing form validation with **regex** and others libraries, reducing runtime bugs by 85%. Maintained clean, documented, and well-tested code for scalability.
- Identified and debugged backend route functionality and middlewares using the **Express.js** framework, optimizing the **backend API performance**, and resolving critical issues. Additionally, conducted comprehensive **API testing** using **Postman** and **Loadtest**, ensuring **reliability**, **scalability**, and seamless **frontend-backend integration**.
- Coordinated and performed **comprehensive testing: unit, integration, and E2E** tests using **Jest**. Collaborating with developers and QA testers with **Git** version control, **Slack** and **GitLab CI/CD pipelines** to streamline structured development.

Freelance

May 2021 – Oct 2021

Frontend Developer

- Analyzed and documented **client requirements**: Illustrated **high** and **low-fidelity mockups** and interactive **prototypes** responsive to mobile and desktop users using **Adobe XD** and **Balsamiq**, ensuring a visually appealing and user-centric interface while following quality **UI/UX design practices**.
- Modeled a fully functional, responsive, and **SEO-optimized** website using modern **HTML**, **SCSS (CSS Preprocessor)**, and **JavaScript** with the **Webpack** build tool and additional **NPM packages** ensuring **cross-browser compatibility**. Hosted on **GitHub** and deployed on **Netlify** web services.

Projects

Itihaas | Website | GitHub

React.js | TypeScript | Node.js | Express.js | Redis | MongoDB | Docker

- Designed and developed a comprehensive **Indian History full-stack** application with **TailwindCSS**, allowing users to explore and contribute online to Indian historical information, and allowing developers to consume the **open-sourced backend API** with **security**, **rate-limiting** and **CORS**, with enhanced **backend caching** with **Redis** in the cloud.
- Conducted extensive **data research, refinement, and curation** to gather credible historical information for building a database using **MongoDB**. **Optimized** frontend architecture using **caching, refetching, and invalidations**. Performed thorough **API** testing using **Postman** and **Vitest**.

Compass

React.js | Node.js | MongoDB | Express.js | JWT | TailwindCSS | Vitest

- A robust individual & collaborative **full-stack** project management platform with **secure authentication** offering users and teams an intuitive tool to manage **projects** with **personalized workflows**
- Established structured **CRUD operations** with **advanced filtering, access control, and status management** services for users, projects, and issues, with powerful **authentication** features, including **JWT**, **Nodemailer** for **OTP services**, and testing with **Vitest** and **Postman**.

Seconds | Website | GitHub

TypeScript | Zod | SCSS | APIs | Vitest | TypeDoc | Vite | Axios

- Developed an application that integrates multiple **third-party** and **native APIs** for **geolocation** and formatted **date** and **time** information. Deployed with **Netlify**, documented with **TypeDoc**, and tested using **Vitest**.

Technical Skills

Languages: JavaScript, TypeScript, Java, Python, C++, SQL, HTML5, CSS.

Libraries/Frameworks: React.js, Next.js, Redux, Vue.js, Pinia, Node.js, Express.js, PostgreSQL, Apache CouchDB.

Developer Tools: Git, GitHub, Docker, MongoDB, Apache Maven, GitLab, Postman, Linux, Vite, Webpack, Jest, Vitest.
