EDUCATION

University of Saskatchewan — Saskatoon, SK

Bachelor of Science in Computer Science — *Graduated: June 2026*

Relevant Courses: Intermediate Data Structures and Algorithms, Full Stack Web Development, Intermediate Software Engineering, Programming Principles and Practices, Programming Language Paradigms.

PROJECTS

Itihaas | Live: itihaas.netlify.app/ | GitHub: github.com/sunillshastry/itihaas-api/ — Sep 2025 – Present

React, TypeScript, Node.js, MongoDB, Redis, Docker, DigitalOcean, BullMQ

- Designed and built a full-stack platform for structured Indian history data (1500+ commits) with MongoDB schema modeling dynasties, rulers, and wars with 100+ entity records served through a documented public REST API.
- Architected a secure, rate-limited API usage for registered users with token-based authentication and email verification using Resend, in an asynchronous approach using BullMQ + Redis message queue service and custom workers.
- Built a responsive, accessible React/TypeScript frontend interface for searching and browsing records, with validated user/API registration and contribution forms; production Lighthouse scores of 96+ across all four categories.
- Self-hosted and deployed on a DigitalOcean Droplet (VPS) with Docker Compose; Load-tested the deployed API with Grafana k6 (4,506 requests, up to 25 virtual users); p95 latency of 327 ms and 952 ms across multiple staged runs.

DinnerDibs | Live: dinnerdibs.vercel.app/ | GitHub: github.com/dinnerdibs/ — Mar 2026 – Present

Next.js, TypeScript, Java, Spring Boot, PostgreSQL, Redis, Docker, AWS, Hibernate

- Building a peer-to-peer marketplace connecting home chefs with local buyers; implemented the Spring Boot REST API backend foundation with over 1,100 lines of source code and 130+ commits, including user registration persisted in PostgreSQL.
- In progress: geolocation-based seller discovery, buyer–seller messaging, and a Next.js/TypeScript client interface.

PROFESSIONAL EXPERIENCE

KinMeet — Sep 2026 – Present

Full Stack Developer Intern — *Toronto, ON*

- Shipped 10+ React/TypeScript components (5+ merged pull requests) to production for a social app connecting expatriates, each covered by Vitest and Playwright tests and released through CI/CD.
- Designed and built the product's persistent theme system using React Context, custom hooks, and a modular Tailwind CSS configuration.
- Improved the Sign Up, Login, Password Reset, and Account Settings-related authentication workflows, and reviewed and merged teammates' pull requests as part of the team's code-review process.

Qutrix — Nov 2021 – Apr 2022

Software Developer Intern — *Bangalore, India*

- Delivered 8 merged pull requests and 20+ responsive React/Sass components (calendars, forms, CMS views, account and profile pages); improved load performance with code splitting and lazy loading.
- Implemented Node.js/Express registration and login routes, strengthened authentication validation with additional edge-case checks, and added custom HTTP error responses for auth failures.

Freelance — Mar 2021 – Oct 2021

Software Developer — *Bangalore, India*

- Turned client requirements into Figma prototypes, then built and deployed a responsive site (HTML, Sass, JavaScript) on Netlify; production Lighthouse: 96 performance, 94 accessibility, 100 best practices, 91 SEO.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, SQL, HTML, CSS.

Backend: Node.js, Express.js, Spring Boot, REST API design, Mongoose, Prisma, Drizzle ORM, Hibernate.

Frontend: React, Next.js, Redux Toolkit, Tailwind CSS, TanStack, Vite, Sass, Webpack.

Databases: PostgreSQL, MongoDB, MySQL, Redis.

Cloud, Tools & Testing: AWS (EC2, S3, CloudFront), Docker, GitHub Actions, CI/CD, BullMQ, Git, GitHub, Netlify, Jest, Vitest, Playwright, React Testing Library, Linux, Grafana k6, Scrum, Kanban.
